CF	Clearfield	F	fair
RR	Roundup Ready	P	poor
LL	Liberty Link	S	suppression
✓	can be used in this crop	C	control (unrated)
x	these grass and broadleaf products can be tank mixed, and/or may be available as prepacks		

Most data is compiled from the Saskatchewan/Manitoba "Guide to Field Crop Protection, 2009" which is presumed to be reliable. Not all tank mixes for a certain use are registered for all formulations of a product. Always refer to manufacturers' labeling and follow application instructions to ensure that herbicides can be used on your specific crop types, varieties, weeds, soil types, weather conditions and so on.
